DISTRIBUTOR PLAYBOOK / ONE SOURCE YOUR NETWORK CAN USE

Equip your dealer network.

Use the website to train retailer teams, share model-specific resources and connect customers with manufacturer support.

Knowledge that travels through your network. MT E.L.K., INC. provides calling education, model-specific care resources, product information and direct office contact. Use the same links with your representatives, retail partners and their customers.

DISTRIBUTOR
Equip your retailer teams

RETAILER
Guide the customer

Download and keep it: website links and contents links remain clickable after saving this PDF. Online resources need Internet access. Printed copies are not clickable; scan the support QR code on page 8. The workflows here are suggested ways to use existing resources, not new account or service commitments.

01 / A PRACTICAL RETAILER ONBOARDING PATH

Make training repeatable.

A suggested onboarding sequence for sales representatives, retailer owners and new counter staff.

01 Start with the manufacturer and the dealer hub.

Introduce the company through About and Legacy, then open the dealer starting area. The existing program presentation and staff-training films are grouped together. Discuss current account terms separately rather than treating a historic guide as a current commercial agreement.

Dealer training hub > **Company story >**

02 Show the model your retailer will discuss.

Open the call's resource page and choose a source demonstration where available. Start with the featured Deer Talk demonstration for a calling example. Invite staff to pause and replay the actual film; this guide does not replace the source instruction.

Deer Talk demonstration > **All videos >**

03 Teach the support route before the first question.

Show staff the difference between a calling demonstration, a band lesson and a reed lesson. Match the exact call to its resource. Ask staff to explain where they would send a customer who cannot identify the model or still has a question after watching.

Model support > **Care library >**

04 Leave a consistent set of links.

Give each retailer the Education, model-care and Support URLs. Share specific lesson pages for the models they carry. Use My Field Guide to organize links on a training device, then download its link list or send the individual URLs to store teams.

My Field Guide > **Education >**

USE A SHARED REFERENCE, NOT AN ASSUMED CERTIFICATION

The dealer presentation and existing films support staff orientation. This suggested training path does not establish accreditation, a required training duration or account approval. MT E.L.K., INC. UNIVERSITY is Coming Soon; current lessons and videos are available now.

02 / WEBSITE NAVIGATION, SEARCH & LINK SHARING

A shared resource desk.

Help every retailer find the same source material without creating a separate copy of each video or lesson.

Education >	Search by model, species or topic; choose a lesson and related resources.
Video library >	Search/filter/sort films; use the embedded queue and previous/next controls.
Call-care library >	Match band or reed replacement to the exact call.
Call-model support >	Open a model's lessons and call-resource page; ask the office when unsure.
Find a resource >	Choose Find or Ctrl/Cmd + K to search lessons, calls, people and records.
My Field Guide >	Save links in the current browser; remove items or export a text link list.

HOW TO SHARE THE RESOURCE THAT ANSWERS THE QUESTION

Individual lesson: open its page and copy the URL.
Video: use the library's Copy Link control to include the selected film and filters.
Filtered learning view: copy the current page address after setting its filters.
Retailer starter kit: send Education, Banding and Support links, then the exact care lesson for each stocked model.

ON PHONES AND SHARED TRAINING DEVICES

Use the phone menu or the bottom Shop, Learn, Videos and Find shortcuts. My Field Guide is local to one browser, does not sync across stores and does not download media. Clear it on a shared device when appropriate. Internet is still needed for films and documents.

03 / TEN SOURCE-MAPPED CALL-CARE RESOURCES

One model. The right care lesson.

Use this directory across your assortment and pass the matching lesson to retailer teams. Call names also open their resource pages.

CALL MODEL	SPECIES	CORRECT CARE LESSON
Deer Talk Call Model resources	Deer	**Band replacement >**
Cow Talk Call Model resources	Elk	**Band replacement >**
Deluxe Cow Talk Call Model resources	Elk	**Band replacement >**
Power Bugle Model resources	Elk	**Band replacement >**
Royal Bugle Model resources	Elk	**Band replacement >**
Antelope Talk Call Model resources	Antelope	**Band replacement >**
Power Howler Model resources	Predators	**Band replacement >**
Yote Howler Model resources	Predators	**Band replacement >**
The Wolf Howler Model resources	Predators	**Band replacement >**
Yote Buster Model resources	Predators	**Reed replacement >**

MAKE THE DISTINCTION CONSISTENT ACROSS THE NETWORK

The current Yote Buster film covers **reed replacement**; the other nine listed care films cover **band replacement**. Do not substitute another model's instruction or infer part compatibility from color. Confirm uncertain models or replacement parts with the office.

All care lessons **Ask about a model**

04 / RETAILER AND CUSTOMER SUPPORT COORDINATION

Support the store behind the sale.

Use the website for shared reference material and bring unresolved product questions to manufacturer support.

01
Retail team
Identify the call and the question.

02
Distributor
Share the exact lesson; gather context.

03
Manufacturer office
Contact us when more help is needed.

QUESTION FROM A STORE OR CUSTOMER

Model is uncertain
Use model support; a clear photo can help the office identify the call.
Support >

Staff need a calling example
Open the demonstration or a relevant film; keep playback on-site.
Education >

A band or reed question remains
Use the mapped care lesson, then contact the office with details.
Care lessons >

Order, return, damage or warranty question
Keep purchase location and receipt/order context; confirm the process.
Policy / contact >

DIRECT MANUFACTURER CONTACT

(406) 517-8923 **office@elkinc.com**

Mailing address: PO BOX 473, Livingston, MT 59047

Send useful context: retailer/business name; distributor contact; call model; the customer's goal or issue; the lesson URL already used; a clear photo if needed; and purchase/receipt details only when relevant. Share only the information needed to address the question.

Prepare a support email

Opens a draft in your mail app. Complete it, attach any photo, review and press Send. It does not send automatically or create a website support ticket.

Confirm any return, exchange, damage or warranty process directly with the office and the published policy. No remedy or response time is promised here. A distributor's internal issue log is a suggested coordination practice, not a website reporting feature or a new service obligation.

05 / PRODUCTS, HISTORY, LANGUAGES & THE MEDIA EXPERIENCE

Put the full brand toolkit to work.

Useful tools for showroom conversations, retailer follow-up and a consistent explanation of the manufacturer behind the calls.

01 Use the live catalog as a product reference.

Shop categories and product search lead to the existing Ecwid catalog, options, stock and public pricing. Visible product/cart suggestions surface related accessories, parts and learning material. Suggestions require review and do not establish part compatibility. Merchant policies are linked from the site.

Public catalog > **Bands and reeds >** **Policies >**

02 Let the preserved record tell the story.

About, Legacy, people pages and the searchable Archive connect company accounts with dated records and unresolved research. Enlarge scans, view original PDFs on-page, download or prepare printing. Supported complete articles have transcripts, downloads and selectable-language audio.

Legacy > **Archive >** **Read and listen >**

03 Meet retailers in their language and on their device.

English, French, Spanish and German editions provide corresponding navigation and available translated article text. Phone layouts, visible focus, zoomable documents and reduced-motion controls support different ways of using the site. Original films/scans stay unchanged; narration needs a matching device voice.

Français > **Español >** **Deutsch >**

04 Add atmosphere - then keep training clear.

Cinematic imagery, supported depth effects and page fades create a branded setting. Optional music offers two tracks, glass controls, a live equalizer, volume/seek/loop and sharing by native Share, copied link, WhatsApp, Facebook or email. Music persists between pages and pauses for video or article audio.

Music and sharing > **Video library >**

A PUBLIC RESOURCE LIBRARY, NOT A WHOLESALE OPERATING SYSTEM

Public cart/checkout, editorial suggestions and saved links do not establish distributor prices, credit, territory rights, network inventory or retailer reporting. Confirm commercial arrangements directly. Videos remain embedded; YouTube may still require sign-in or restrict playback. Shared music links do not autoplay.

06 / REGIONAL DEVELOPMENT & FUTURE TRAINING

Connect the next chapter carefully.

Use planning, partner and learning pages to start informed conversations without treating future plans as confirmed market coverage.

01 Canada: a regional approach to discuss.

The proposed Western Canada plan centers on regional distributors, retailer coverage, stock/replenishment capacity and staff education. British Columbia, Alberta, Saskatchewan and Manitoba are planning areas, not assigned territories. Confirm partners, the pilot province, quantities and cross-border responsibilities separately.

Canada plan > **Launch presentation >**

02 International: preserve the story, build relationships.

The website names United States, Canada, Germany, Spain, Argentina and Central Asia as country/regional chapters. Use the summaries to discuss relevant records, publications and potential relationships. The list is not evidence of active distributors or established market-entry dates.

International chapters >

03 MT E.L.K., INC. UNIVERSITY: Coming Soon.

The live overview describes planned calling education, call care, the video archive and company history. It gives future training a clear destination. Existing Education, Videos and care lessons are available now; no launch date, enrollment, certification or completed course program is announced.

University preview > **Current lessons >**

04 Guidefitter: a distinct program route.

The on-site overview introduces Guides & Outfitters, Military & First Responders and Outdoor Industry Pros paths. Clearly labeled links continue to Guidefitter for account verification and current program information. Program access is not automatic and does not establish distributor account status.

Guidefitter overview >

KEEP ACCOUNT AND TERRITORY DISCUSSIONS SEPARATE FROM THE PUBLIC PAGES

Use the website to explain the plan and gather a useful application. Commercial approval, distributor terms, coverage, exclusivity, pricing, ordering and support arrangements require direct confirmation. Guidefitter's external account pages open outside the website.

07 / DISTRIBUTOR APPLICATION & SHAREABLE REFERENCE LINKS

Your distributor desk kit.

One place to begin account discussions, organize retailer resources and make the next support step clear.

APPLY USING THE DISTRIBUTOR PATH

Open the Dealer or Distributor application and select **Distributor**. The five stages cover business/contact, customers/territory, purchasing plans, operating capacity, then review/authorization. Explain your independent retailer network or recruitment plan, proposed reach, stocking, replenishment, training and cross-border readiness.

The application includes conditional EIN and directory-interest questions, typed-signature consent and a saved device timestamp. Review and export the complete PDF or print copy. **Submit Application** stores the form; preparing an email or downloading a PDF alone does not submit it.

Open distributor application

Dealer program and training >

GIVE EACH RETAILER A PRACTICAL STARTER KIT

Calling lessons >	Choose a demonstration or learning path.
Video library >	Search, filter and watch within the site.
Model-specific care >	Send the exact band or reed lesson.
Manufacturer support >	Find the model and direct contact route.
Company legacy >	Explore the preserved story and sources.

SCAN TO OPEN MODEL SUPPORT

www.mtelkinc.com/support/

Use the QR from a printed copy. Send the support page or an individual lesson URL to retailer teams. My Field Guide is local to a browser, not a shared network account.

Call (406) 517-8923

Email office@elkinc.com

Applications are reviewed individually; approval and directory listing are not automatic. Native website receipt confirms form storage, not email inbox delivery. Applicant-prepared email requires attaching the PDF and pressing Send. The signature uses device-reported time, not identity certification. Use customer support for product questions, not the business-account application.
