THIS PDF STAYS CLICKABLE AFTER DOWNLOAD

Save/download the PDF and open it in a PDF reader. Orange buttons and website links open the site; Contents and topic links move within this document. Internet is required for website pages, videos and audio. Printed copies are not interactive.

01 / FIRST IMPRESSION & DISCOVERY

A clear way into the website

The homepage introduces the manufacturer and gives hunters, customers and prospective partners clear next steps.

Manufacturer story and a visible store

The homepage combines company heritage, outdoor imagery, a cinematic store feature and a University preview.
Use it: Choose Shop, Learn, Legacy or the dealer application from the homepage.

Open homepage > **About the company >**

WHY IT MATTERS

Keeps the brand story and the visitor's next action together.

Phone navigation and cinematic movement

Menus, persistent phone shortcuts, page fades, optional click sound and supported hero-depth effects carry the brand through the site.
Use it: Use the phone menu or bottom navigation; pause motion or navigation sound when preferred.

Try the navigation >

WHY IT MATTERS

Helps visitors move between sections without losing their place or controls.

Resource finder and shareable filters

The finder searches lessons, videos, call resources, historical records, people and pages. Library filters preserve useful selections in the URL.
Use it: Choose Find or use Ctrl/Cmd + K; search by model, person or subject.

Explore Education > **Browse Archive >**

WHY IT MATTERS

Shortens the route to the right information and makes useful views easy to share.

My Field Guide

Visitors can save resource links, remove individual items, clear the list or download a text list of links.
Use it: Choose Save to Field Guide on supported resources, then revisit My Field Guide.

Open My Field Guide >

WHY IT MATTERS

Creates a personal return path without requiring a visitor account.

SAVED LINKS, NOT OFFLINE MEDIA

My Field Guide stays in the current browser. It does not sync across devices, and saved videos or documents still need Internet access. Cinematic effects include reduced-motion and device fallbacks.

02 / ABOUT, LEGACY & ARCHIVE

The legacy, with the evidence

The historical experience connects the company account with dated records, people, readable text and preserved originals.

About, Legacy and the people behind them

Company accounts, dated primary records and details awaiting verification are identified separately. People pages link the wider story.
Use it: Move from About or Legacy to the named person or original historical record.

About > **Legacy >**

WHY IT MATTERS

Builds understanding through visible evidence rather than unsupported heritage claims.

Searchable historical archive

The archive offers keyword search, year/type filters, unique record pages and chronological previous/next navigation. Duplicate display entries were consolidated.
Use it: Search a topic or year; open a record to see its description and supporting material.

Open Archive >

WHY IT MATTERS

Makes the surviving record easier to explore while keeping source context intact.

Original scans, PDF viewing and printing

Scan previews enlarge on the page. Original PDFs open in an on-site viewer with page controls, zoom, download and print preparation.
Use it: Select View original source, then Download PDF or Prepare print / Print document.

Try an original record >

WHY IT MATTERS

Lets a visitor examine evidence and keep a copy without losing the surrounding story.

Full article text and selected-language audio

Recoverable full texts have transcripts, transcript downloads and Listen/Pause/Resume/Stop with reading-speed controls.
Use it: Choose the site language and open a record's Read & listen area.

Read and listen > **French edition >**

WHY IT MATTERS

Offers another way to use long historical articles, including on a phone.

SOURCE QUALITY AND VOICES STILL MATTER

Full narration is offered only where complete, matching text is recoverable. Missing, cropped or unreliable sources are labeled. Audio requires a matching device/browser voice; translated transcripts are labeled machine-translated. Original scans stay unchanged.

03 / LESSONS, VIDEOS & CALL CARE

Education that is easy to find

Separate learning tools help visitors practice a sound, locate a film or match the correct maintenance lesson.

Searchable lessons and guided learning

Education combines search, supported species/model/topic filters, lesson pages and a guided Deer Talk pathway. Call-resource pages gather related material.
Use it: Choose your call or objective, then open the matching lesson and its related resources.

Education hub > **Deer Talk pathway >**

WHY IT MATTERS

Reduces guesswork about where to begin and what to study next.

Embedded video library and viewing queue

The library combines categories, search, model/topic/length filters, sorting, previous/next controls, a queue selector and copied viewing links.
Use it: Choose a video to load the player inside the website; move through the filtered queue.

Video library > **Call-care videos >**

WHY IT MATTERS

Supports uninterrupted browsing and keeps the learning context close to the film.

Model-specific band and reed care

The care library keeps ten source-mapped lessons and distinguishes band replacement from reed replacement. Each lesson has its own page.
Use it: Match the exact call before following the film; ask support if identification is uncertain.

Banding instructions > **Yote Buster lesson >**

WHY IT MATTERS

Helps visitors reach the relevant maintenance resource for their equipment.

MT E.L.K., INC. UNIVERSITY

A Coming Soon page describes planned calling education, video-archive training, call care and company history; current learning links are already available.
Use it: Read the plan, then use the existing Education and Video libraries today.

University - Coming Soon >

WHY IT MATTERS

Gives the future training program a clear home without presenting planned courses as launched.

ON-SITE PLAYERS; PROVIDER-CONTROLLED PLAYBACK

Website video controls keep viewing embedded and load the player after interaction. YouTube may still require sign-in or restrict playback; its own iframe controls cannot all be disabled. The University has no announced enrollment, qualification or launch date.

04 / SHOPPING & PRODUCT DISCOVERY

The store, connected to learning

The storefront uses the existing Ecwid catalog, with clearer entry points and contextual suggestions inside the branded website.

Catalog, categories and product search

The store exposes calls, replacement bands/reeds, books, DVDs, blinds and species categories. Existing merchant data supplies current options, prices and stock.
Use it: Choose Shop, browse a category, search a product and open its native product page.

Open Shop > **Bands and reeds >**

WHY IT MATTERS

Makes the complete catalog easier to reach without maintaining a separate price list.

Embedded cart and checkout entry

The Ecwid storefront, cart and checkout remain connected while visitors browse other site sections. The provider script loads when the store is visited.
Use it: Choose a product and its required options, review the cart, then continue to checkout.

Browse the store >

WHY IT MATTERS

Keeps shopping and education in one branded journey and preserves cart continuity.

Visible add-on and package suggestions

Product/cart previews and a swipeable suggestion rail surface source-supported replacement parts, learning materials, accessories and package alternatives.
Use it: Open a suggestion to review its price, availability and options before choosing it.

See product suggestions >

WHY IT MATTERS

Helps visitors consider useful related items while avoiding automatic additions or duplicate suggestions.

Product knowledge and policy access

Store pages link to model resources and published disclosures. The payment-policy revision reflects the existing Ecwid checkout.
Use it: Consult a call's lessons or the policy pages before making a purchase decision.

Support by model > **Disclosures >**

WHY IT MATTERS

Connects purchase decisions with care information and clear policy access.

COMMERCE BOUNDARIES

Suggestions are editorial catalog matches, not purchase-history or popularity claims. They are suppressed during checkout/payment. Bank authentication or payment-provider approval may use provider-controlled flows. Full payment settlement and fulfillment are not certified by this guide.

05 / DEALERS, CANADA & INTERNATIONAL

A route for future partners

Business-development pages organize conversations and training without inventing approvals, commercial terms or established market coverage.

U.S. dealer starting area

Prominent application links, three process steps, the preserved dealer program presentation and three staff-training lessons sit together.
Use it: Begin at the dealer hub, review the presentation, then choose Dealer or Distributor in the application.

Dealer starting area > **Start application >**

WHY IT MATTERS

Gives prospective partners a practical starting point and existing educational resources.

Canada regional launch planning

The Canada pages explain the proposed regional distributor/retailer approach, product education, stocking considerations and launch resources.
Use it: Review the regional plan or presentation and submit business details for discussion.

Canada plan > **Canada presentation >**

WHY IT MATTERS

Supports the chosen Western Canada regional approach before a province or partners are finalized.

International direction and research

The site names United States, Canada, Germany, Spain, Argentina and Central Asia as country/regional chapters for the story and direction ahead.
Use it: Explore the chapter summaries and use contact channels to contribute relevant records or relationships.

International chapters >

WHY IT MATTERS

Shows the direction for preservation, education and relationship development with clear research boundaries.

Guidefitter program information

An on-site overview explains the Guides & Outfitters, Military & First Responders, and Outdoor Industry Pros paths and their next steps.
Use it: Read the overview, then choose the clearly labeled external Guidefitter account link if relevant.

Guidefitter overview >

WHY IT MATTERS

Makes the partner program discoverable while leaving eligibility and account decisions with Guidefitter.

PLANS ARE SEPARATE FROM APPROVED COMMERCIAL ARRANGEMENTS

International chapter names are not proof of active distribution or market-entry dates. No automatic approval, exclusive territory, wholesale pricing, order minimum or launch deadline is promised. Guidefitter's external account pages open outside the website.

06 / QUALIFICATION, DOCUMENTS & DELIVERY

A complete application workflow

The five stages cover business/contact, customers/territory, purchasing plans, operating capacity, then review/authorization.

Dealer or Distributor qualification

Conditional questions cover business identity, sales channels, retailer reach, purchasing volume, stocking, fulfillment, documentation, references, EIN and directory interest.
Use it: Select your account path; complete the relevant questions and review the full summary.
Open blank application >

WHY IT MATTERS

Collects consistent information for a manual status decision without claiming automatic qualification.

Complete PDF, print and prepared email

Validated review offers Print / Save PDF, a browser-generated full PDF and prepared email details to Phillip with Jesse copied.
Use it: Download the PDF; copy the prepared details, open your mail app, attach the PDF and send yourself.

Review application tools >

WHY IT MATTERS

Gives the applicant a complete copy and a practical email handoff alongside website submission.

Typed signature and saved timestamp

Consent records the typed name, device-clock time, browser language/time zone and browser information. Editing an answer invalidates the saved signature.
Use it: Review, consent and save the signature; export or submit the same recorded details.
View signature step >

WHY IT MATTERS

Makes the applicant's authorization visible in the saved and submitted application copies.

Native submission and separate staff alerts

Submit Application stores the full form in Netlify. Four localized forms and form-specific staff notifications are configured. Safe share links contain only a blank application URL.
Use it: Use Submit Application to store the record; downloading or preparing email alone does not submit it.
Submit through the form > **French form >**

WHY IT MATTERS

Keeps website intake distinct from applicant-controlled exports and avoids misleading delivery messages.

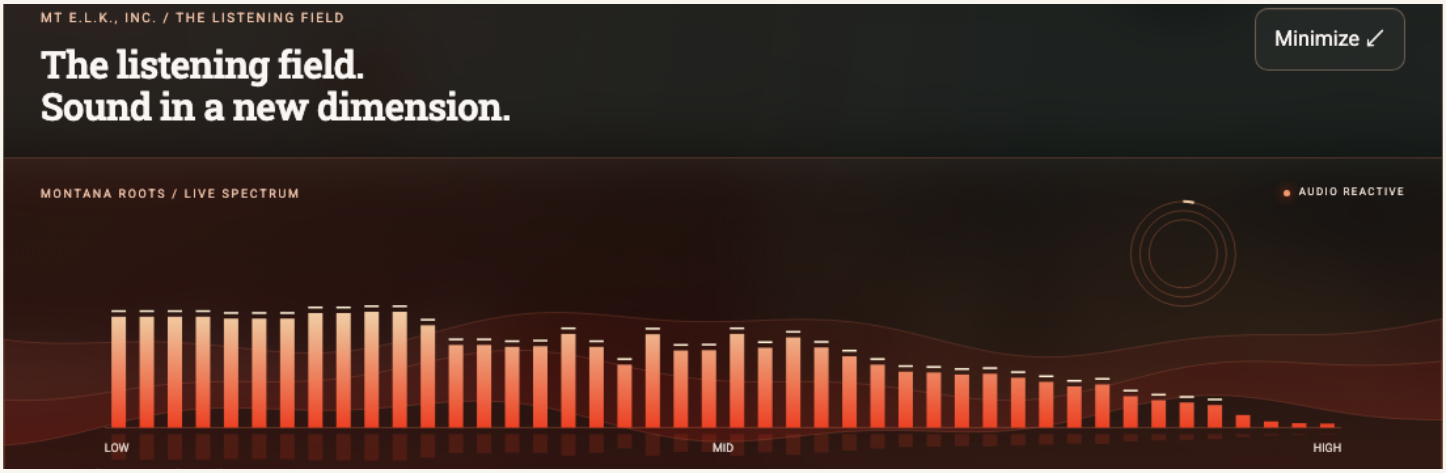

WHAT IS VERIFIED, AND WHAT IS STILL AN INTEGRATION

Live tests verified full form storage; staff inbox receipt is not independently confirmed. Native staff alerts are separate copies, not a true Cc email. Company-sender automation and applicant autoresponders remain unconfigured. A typed signature/device timestamp does not verify identity; Netlify's server IP record is separate from the local PDF.

07 / MUSIC & SOCIAL SHARING

A soundtrack, on the visitor's terms

Optional music, a transparent glass interface and a live spectrum add atmosphere while preserving user control.

Transparent glass and a live equalizer

The branded player offers a glass surface, a solid-surface option and bars driven by the actual playing track.
Use it: Open Music, press Play, adjust visual motion or choose the solid background.

Open the player >

WHY IT MATTERS

Adds a distinctive audio experience while retaining contrast and motion choices.

Two tracks, full controls and continuity

Track selection, play/pause, position, volume, loop, stop/rewind and native audio controls are available. Internal navigation keeps music playing.
Use it: Minimize to browse; use Pause anytime. Opening video or article audio pauses music.

Cowtalk Song > **Second soundtrack >**

WHY IT MATTERS

Provides atmosphere without forcing competing sound over education or spoken articles.

Sharing without autoplay

Native Share where supported, Copy Link, WhatsApp, Facebook and prepared email share a clean, localized selected-track URL.
Use it: Choose a sharing option; the recipient opens the track controls and presses Play.

Try soundtrack sharing >

WHY IT MATTERS

Makes a branded soundtrack easy to pass along without exposing page/form state or starting unwanted audio.

Original glass/audio styling uses public HorizonX references as inspiration. Rendering stops when paused, minimized, offscreen or hidden; reduced-motion preferences show a still spectrum. No paid HorizonX source or external visual runtime is bundled.

08 / LANGUAGES, SUPPORT & ACCESSIBILITY

More ways to use the same site

Language choices and practical support are part of the visitor experience, with source materials and device limitations explained.

English, French, Spanish and German

Language editions retain corresponding page paths and useful filters. Supported archive records include translated readable text and selected-language audio.
Use it: Choose a language in the site controls; use the original scan for exact historical wording.

Français > **Español >** **Deutsch >**

WHY IT MATTERS

Helps more visitors explore the same business, education and historical resources.

Direct manufacturer support

Support organizes model resources, common questions, phone/email contact and guidance on what details or photos help the office respond.
Use it: Match a model first, then call or prepare an email with the model and your question.

Support guide > **Contact >**

WHY IT MATTERS

Can make support conversations more useful and reduce model-identification uncertainty.

Phone usability and accessibility

Responsive layouts, visible keyboard focus, native/accessible dialogs, focus return, readable controls, reduced-motion support and safe-area spacing are implemented.
Use it: Use touch or keyboard; close dialogs with visible controls or Escape; reduce motion when preferred.

Try a source viewer > **Try the phone library >**

WHY IT MATTERS

Keeps core content and controls usable across different screen sizes and interaction preferences.

Published disclosures and clear handoffs

The disclosure hub links the existing shipping/payment and shipping/returns records, preserves source downloads and identifies the authorized Ecwid revision.
Use it: Read the relevant policy; support email opens your mail app for you to review and send.

Policies hub > **Payment policy >**

WHY IT MATTERS

Makes important information accessible without implying an unconnected contact form or automatic message delivery.

LANGUAGE AND ACCESSIBILITY LIMITS

Original scans, source films and some policy bodies remain in their source language. Product/checkout translations depend on merchant settings. Article audio needs matching device voices. Browser checks are not certification of every device, assistive technology or historical browser.

09 / FOUNDATION, LAUNCH STATUS & QUICK LINKS

Built to grow. Clear about status.

The website connects reusable content, public pages and existing service integrations. Benefits describe intended use, not measured sales or performance guarantees.

THE FOUNDATION

Reusable content records generate lesson, call, person and archive pages without duplicating layouts. Stable paths, breadcrumbs, page metadata, search indexes, sitemap entries and redirects support discovery and future updates.

Lean delivery: static public pages, responsive images, reserved dimensions, optimized fonts, versioned caches and interaction-loaded video, music and document engines limit unnecessary initial work. This supports usability; field Core Web Vitals and a guaranteed loading-time improvement have not been established.

STATUS AT A GLANCE

AVAILABLE	Main pages, embedded store, learning libraries, archive tools, application and music experience.
COMING SOON	MT E.L.K., INC. UNIVERSITY is a live overview of planned training, not an enrolled course program.
VERIFY / CONNECT	Companion-domain DNS/HTTPS, company-sender email automation, applicant autoresponders, staff inbox delivery and payment settlement each need separate completion or verification.

ONE PRIMARY WEBSITE / SHORTCUTS TO THE RIGHT SECTION

canada.mtelkinc.com	**/canada/**
usadealers.mtelkinc.com | mtelkincusa.com + www	**/dealers/us/**
application.mtelkinc.com	**/dealer-application/**
university.mtelkinc.com | mtelkincuniversity.com + www	**/university/**
mtelkinc.shop + www	**/shop/**

The rows describe configured destinations, not a claim that every companion hostname has finished DNS/HTTPS activation. Use the clickable main-site paths at right now. The primary address is **www.mtelkinc.com**; the original elkinc.com website and the technical Netlify address remain separate references.

A FIVE-STOP REVIEW FOR PHILLIP AND CHELSEA

Read a record > **Watch a lesson >** **Explore Shop >**

Review the application > **See the University plan >**

Prepared October 21, 2026 from the current project and implementation verification records through October 20. Canonical link checks accompany this guide. No order, application or message was submitted while preparing it.
